

Appl. No. : 09/815,507  
Filed : March 23, 2001

### AMENDMENTS TO THE CLAIMS

1. (Currently amended) A method of sending data stored in a database ~~from~~ by a sender to a recipient, which are mobile phone users, in relationship with a manager defining a managing software application, said database and said manager being in connection with a website, comprising:

entering into a connection between the sender and the manager, wherein the sender enters into said connection with the manager and provides sender identification to the manager;

transferring an identifier to the manager, wherein the sender transfers said identifier comprising at least a recipient's mobile phone number; ~~and~~

associating an e-mail address or a URL address with said identifier by the manager, wherein the associating comprises selectively accessing said database according to whether the sender is a subscriber to the sending data service; and

sending said data stored in said database to said recipient's e-mail address or URL address.

2. (Original) The method of Claim 1, wherein said identifier comprises furthermore a code related to a selection in the database of the data to be transmitted, said manager associating said data to be transmitted to said e-mail address or said URL address.

3. (Original) The method of Claim 1, wherein said manager associates the recipient's e-mail address with said identifier, wherein the manager sends an e-mail to said recipient, said data being attached to said e-mail, in case the recipient's e-mail address is known to the manager and is listed in a central database.

4. (Original) The method of Claim 1, wherein said manager associates a URL address with said identifier, wherein the manager sends an SMS message comprising said URL address to the recipient's mobile phone, said URL address offering access to a web page comprising said data, said URL address being parameterized with the recipient's mobile phone number, and wherein the manager sends the SMS message in case the recipient's e-mail address is not known to the manager.

5. (Currently amended) The method of Claim 4, wherein said URL is ~~securitized~~ secured by a login password which is communicated to the recipient by way of said SMS message.

6. (Original) The method of Claim 1, wherein the sender uses a WAP mobile phone.

7. (Currently amended) A method of retrieving data being stored in a database, and belonging to an owner, by a recipient who is a mobile phone user, in relationship with a manager defining a managing software application, said database and said manager being in connection with a web site, towards a recipient, comprising:

entering into a connection between the recipient and the manager, wherein the recipient enters into the connection with the manager by sending an identifier to said manager, and wherein said identifier allows said manager to identify said owner; ~~and~~

identifying the recipient by the manager through the recipient's mobile phone number, wherein said manager creates and associates ~~an e-mail address or~~ a URL address with the recipient's mobile phone number; and

retrieving said data stored in said database to said URL address.

8. (Currently amended) The method of Claim 7, wherein said recipient adds a code to said identifier, said code being related to ~~the~~ a selection of the data to be transmitted, said manager associating said data ~~to be transmitted to said e-mail address or~~ with said URL address.

9. (Original) The method of Claim 7, wherein said manager, after identifying said recipient, immediately sends a message comprising a summary of the data of the owner to said recipient's mobile phone.

10. (Original) The method of Claim 9, wherein said message is an SMS message.

11. (Original) The method of Claim 9, wherein said message is a vocal message.

12. (Original) The method of Claim 7, wherein said manager associates the recipient's e-mail address with said mobile phone number, wherein the manager sends an e-mail

**Appl. No.** : 09/815,507  
**Filed** : March 23, 2001

to said recipient, said data being attached to said e-mail, in case the recipient's e-mail address is known to said manager and listed in a central database.

13. (Currently amended) The method of Claim 7, ~~wherein said manager associates a URL address with said mobile phone number~~, wherein the manager sends an SMS message comprising said URL address to the recipient's mobile phone, said URL address offering access to a web page comprising said data, said URL address being parameterized with the recipient's mobile phone number, ~~and wherein the manager sends the SMS message in case the recipient's e-mail address is not known to said manager.~~

14. (Currently amended) The method of Claim 13, wherein said URL is ~~securitized~~ secured by a login password which is communicated to the recipient by way of said SMS message, comprising said URL.

15. (Original) The method of Claim 7, wherein said recipient uses a WAP mobile phone.

16. (Currently Amended) The method of Claim 15, wherein said recipient gains direct access to the data belonging to the owner or to a WAP site owned by said data owner.

17. (New) A method of retrieving data being stored in a database, and belonging to an owner, by a recipient who is a mobile phone user, in relationship with a manager defining a managing software application, said database and said manager being in connection with a web site, towards a recipient, the method comprising:

entering into a connection between the recipient and the manager, wherein the recipient enters into the connection with the manager by sending an identifier to said manager, and wherein said identifier allows said manager to identify said owner;

identifying the recipient by the manager through the recipient's mobile phone number, wherein said manager associates an e-mail address with the recipient's mobile phone number by selectively accessing said database according to whether the recipient is registered with the retrieving data service; and

retrieving said data stored in said database for later sending to an e-mail address.

**Appl. No.** : **09/815,507**  
**Filed** : **March 23, 2001**

18. (New) The method of Claim 17, wherein said recipient adds a code to said identifier, said code being related to a selection of the data to be transmitted, said manager associating said data to be transmitted with said e-mail address.

19. (New) The method of Claim 17, wherein said manager, after identifying said recipient, immediately sends a message comprising a summary of the data of the owner to said recipient's mobile phone.

20. (New) The method of Claim 19, wherein said message is an SMS message.

21. (New) The method of Claim 19, wherein said message is a vocal message.

22. (New) The method of Claim 17, wherein the manager sends an e-mail to said recipient.

23. (New) The method of Claim 17, wherein said recipient uses a WAP mobile phone.

24. (New) The method of Claim 23, wherein said recipient gains direct access to the data belonging to the owner or to a WAP site owned by said data owner.
